

Windchill Upgrades and Installations

Keeping Windchill current is one of the most effective ways to improve performance, security, and user experience. This also reduces the cost and risk of running on outdated versions. EAC's Windchill Upgrade and Installation services help organizations plan, execute, and validate Windchill deployments, whether you're installing Windchill for the first time, upgrading to a newer release, or modernizing your environment to support new capabilities and broader adoption.

Use the sections below for a high-level overview of what's included in EAC's Windchill upgrade and installation approach. For more detailed scoping, reference the linked service details or contact EAC for a tailored upgrade plan and estimate.

Capabilities	Windchill Fast Track Upgrade	Windchill Standard Upgrade	Windchill Advanced Upgrade
Single Step Upgrade	✓	✓	✓
Single CAD Publisher	✓	✓	✓
New Server Required for Upgrade	✓	✓	✓
More than 15 Users in Windchill		✓	✓

Existing Change Management or Workflows		✓	✓

Capabilities	Windchill Fast Track Upgrade	Windchill Standard Upgrade	Windchill Advanced Upgrade
PTC Navigate Server Install		✓	✓
Minimal Downtime (upgrade over the weekend)		✓	✓
SSO Implementations			✓
Customizations			✓
ERP or Other Integrations			✓

Next Steps with Windchill Upgrades & Installations

Once you've reviewed the service approach, the best next step is to confirm your upgrade or installation scope and de-risk the path to go-live. Start by aligning on your current Windchill version and environment, identifying key integrations (CAD, ERP, SSO, reporting), and defining what must be validated during testing (workflows, lifecycles,

performance, and critical business processes).

Ready to install or upgrade Windchill? Contact EAC for a brief discovery session to review your current environment, goals, and constraints. We'll provide a recommended upgrade/installation plan, timeline, and next-step estimate
