

How can AI transform your business?

AI Strategy Workshop

Turn AI curiosity into clear, operationally grounded action.

Most organizations don't need more AI ideas — they need focus. This **4 hour workshop** helps leadership teams quickly identify where *AI can deliver real value*, align stakeholders, and develop a prioritized list of high-value initiatives worth acting on — including opportunities across **operations, manufacturing, and the shop floor**, not just the back office.

Align

- Surface and prioritize pain points across business, operations, and execution.
- Ensure efforts are grounded in how work actually gets done.

Generate

- Rapid AI-centric solutions ideation tied directly to the highest-value problems.
- Operational, manufacturing, and front line use cases.

Prioritize

- Score ideas by Desirability, Feasibility, and Viability.
- Remove subjectivity and arrive at a defensible short list.

What You'll Walk Away With

- Alignment on AI priorities across business and operations
- A ranked list of problem statements across affinity groups
- Actionable insights translating directly to AI starter projects
- A clear path forward, including recommended next steps, ownership, and follow-up action

Who should attend?

- Cross-Functional Leaders
- Executives and Strategists
- Department Leaders
- Process Leaders
- IT Leaders
- OT Leaders

Ready to Move Forward?

You want to turn AI interest into focused, practical action. This workshop is ready to help you get started with confidence.
