

Virtual Teammates for Your Factory Floor

Turn information overload into intelligent action

OpsMate AI is the decision intelligence layer that sits on top of your existing systems. Turn your factory's data and know-how into virtual teammates that make decisions and take actions—not just display dashboards—across every line and every shift.

90%

Up to 90% faster finding critical information

50%

Up to 50% skilled-labor productivity improvement

40%

Up to 40% reduction in MTTR

30%

Up to 30% faster new hire onboarding

Factory Brain

A living, unified industrial knowledge graph that powers AI assistants and agents with factory-specific context. We connect your OT and IT systems, ingest unstructured documents, and capture tribal knowledge—all in one place.

DATA

INSIGHT + KNOWLEDGE

Intelligent Assistants

AI assistants continuously learn from SMEs and advise frontline teams on what happened, why, and how to fix it. From troubleshooting to knowledge management, they put expert guidance in every operator's pocket.

DECISION + ACTION

Factory Brain

Autonomous agents monitor operations, diagnose anomalies, and execute corrective and preventative actions. From root-cause analysis to operations reporting, they work alongside your team 24/7.
